HAVING A RED OR YELLOW CLASSIFICATION FOR THE FSC INVOLVED. STATEMENT OF WORK FOR ACTIVATED DIFFUSION HEALING
(ADH) REPAIR OF J69-T-25A TURBOJET ENGINE PART TURBINE
INLET NOZZLE, T.O. 2J-J69-73

Requisition: 3339-2766

PLACE OF PERFORMANCE: Contractor Facility

1. BACKGROUND: NAVSEA Keyport requires a contractor to provide repair services on the J69 TurboJet Engine Turbine Inlet Nozzle. The contractor must have the capability to perform the Activated Diffusion Healing (ADH) process to repair cracks on the J69 Turbine Inlet Nozzle. This process will include operations such as glass beading, fluorescent penetrant inspection, hydrogen cleaning, vacuum brazing, and others. Currently this proposed process is not covered in the Technical Order Manual T.O. 2J-J69-73, however the final parts must meet the allowable crack criteria of this reference T.O.

Technical Order Manual T.O. 2J-J69-73.

2. SCOPE:

2.1 Activated Diffusion Healing (ADH) crack repair on the J69 Turbine Inlet Nozzle. NAVSEA Keyport will inspect the parts initially to determine assets in need of the ADH repair. After initial inspection at NAVSEA Keyport, the parts will be sent to the contractor for ADH process development. This process should include visual inspection, glass beading, fluorescent penetrant inspection (FPI), degrease, hydrogen clean, application of ADH superalloy mix, vacuum furnace, FPI, and repeating of steps necessary to repair all the cracks. The amount of necessary repairs will vary from part to part.

2.2 —Contractor shall have documented experience with the ADH process and in applying the ADH process to gas turbine parts with similar alloys as used on the J69 Turbine Inlet Nozzle. (See list below of materials used in the fabrication of the two types of J69 Turbine Inlet Nozzles).

J69 Turbine Inlet Nozzle (706555 Assy) fabricated of:
AMS 5645 or 5646 SST for Lugs
AMS 5645 SST for Outer Housing
AMS 5668 or OPT 5671 SST for Inner Flange
AMS 5512 SST for Vane Outer Housing
AMS 5537 STL for Vanes & Vane Inner Housing

J69 Turbine Inlet Nozzle (722815 Assy) fabricated of:

INCO 625 alloy for Lugs
AMS 5702 steel for Inner Flange & Outer Rear Flange
AMS 5599 alloy for remainder

I don't understand the intent of the J69 references. Are AMS and INCO specific alloys, so this list is providing the similar alloys? What are the 706555 Assy and 722815 Assy? Will this make any sense to the contractors? Will they know what you are talking about (I don't). With the edited clarification, the alloys should make sense.

3. REFERENCES: Contractor shall provide no less than three references, validating similar processes they have performed within the last twenty-four months. In addition, contractors shall supply documentation of the methodology employed in each instance.

Specifically what do you want them to submit? Do you literally just want references (i.e points of contact) or do you want them to submit process documentation for you to review? We want customer name and point of contact info, project or work title (item repaired), date of work, and a brief description of the process used. The contractor, in addition to cost, will be evaluated on the basis of past performance and best value to the government.

4. REQUIREMENTS:

4.1 Task A: If not previously approved by NAVSEA Keyport for this specific J69 Turbine Inlet Nozzle ADH repair, the contractor will develop and apply the ADH process on two 1st article components. The two Turbine Inlet Nozzles will be repaired and inspected by the contractor and sent to NAVSEA Keyport along with process documentation as First Articles.

The process documentation will include a brief process description with a signed certification and inspection reports. NAVSEA Keyport will inspect the parts and review the documentation as part of the acceptance process.

4.1.1 Typical repair sequencing of operations by contractor:

1. Visually inspect parts
2. Glass bead blast
3. NDI (fluorescent penetrant inspection)
4. Degrease and hydrogen clean
5. ADH alloy applied
6. Vacuum braze

7. Visual inspect & NDI (fluorescent penetrant inspection)
8. Repeat (re-alloy)
9. Vacuum braze
10. Final inspection

4.1.2 T.O. 2J-J69-73 pages needed: Needed for what and by whom? This section needs to be clarified. These are the pages of the T.O. 2J-J69-73 that the contractor needs to understand the inspection and repair criteria of this component.

Description:	Pages:
Fluorescent Penetrant Inspection	5-2 to 5-4
Inspection and Repair Table	5-22 to 5-23
Inlet Nozzle Repair	5-117 to 5-132

4.2 Task B: After government (NAVSEA Keyport) approval of First Articles, contractor will perform the Activated Diffusion Healing (ADH) process repair on additional Government-Furnished Material (GFM) Turbine Inlet Nozzles. Lot sizes will consist of four parts, minimum. Although the general lot size will be four, the quantity will be flexible to accommodate efficiency and throughput. Contractor will operate on a "not-to-exceed" basis with the amount detailed in the contract.

4.2.1 Deliverable Product: Turbine Inlet Nozzles with vane cracks and other cracks repaired by the ADH process. Parts will be delivered from the contractor in a repaired condition with appropriate documentation (What is the "appropriate documentation?") (previously stated in 4.1) for process control and inspection.

4.2.2 Schedule:

—Repaired items shall be delivered within 4 weeks after receipt of GFM. Technical problems and schedule delays shall be reported to NAVSEA Keyport immediately via email to jwalls@kpt.nuwc.navy.mil, copy to the personnel identified in paragraph 7 below.

5. GOVERNMENT-FURNISHED PROPERTY AND INFORMATION: Government Furnished Materials (repairable Turbine Inlet Nozzles) will be provided to the contractor via transfer of material and documents.

6. QUALITY ASSURANCE REQUIREMENTS: Acceptance criteria is detailed in the Technical Manual T.O. 2J-J69-73.

7. Technical Points of Contact at NAVSEA Keyport:

**** UNIFORM ALLOWANCE ****

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract, by the employer, by the state or local law, etc.), the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition, where uniform cleaning and maintenance is made the responsibility of the employee, all contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual cost), reimburse all employees for such cleaning and maintenance at a rate of \$3.35 per week (or \$.67 cents per day). However, in those instances where the uniforms furnished are made of "wash and wear" materials, may be routinely washed and dried with other personal garments, and do not require any special treatment such as dry cleaning, daily washing, or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract, by the contractor, by law, or by the nature of the work, there is no requirement that employees be reimbursed for uniform maintenance costs.

REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE (Standard Form 1444 (SF 1444))

Conformance Process:

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), be classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination. Such conformed classes of employees shall be paid the monetary wages and furnished the fringe benefits as are determined. Such conforming process shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees. The conformed classification, wage rate, and/or fringe benefits shall be retroactive to the commencement date of the contract. {See Section 4.6 (C) (vi)} When multiple wage determinations are included in a contract, a separate SF 1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

- 1) When preparing the bid, the contractor identifies the need for a conformed occupation) and computes a proposed rate).
- 2) After contract award, the contractor prepares a written report listing in order proposed classification title), a Federal grade equivalency (FGE) for each proposed classification), job description), and rationale for proposed wage rate), including information regarding the agreement or disagreement of the authorized representative of the employees involved, or where there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.
- 3) The contracting officer reviews the proposed action and promptly submits a report of the action, together with the agency's recommendations and pertinent information including the position of the contractor and the employees, to the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, for review. (See section 4.6(b)(2) of Regulations 29 CFR Part 4).
- 4) Within 30 days of receipt, the Wage and Hour Division approves, modifies, or disapproves the action via transmittal to the agency contracting officer, or notifies the contracting officer that additional time will be required to process the request.
- 5) The contracting officer transmits the Wage and Hour decision to the contractor.
- 6) The contractor informs the affected employees.

Information required by the Regulations must be submitted on SF 1444 or bond paper. When preparing a conformance request, the "Service Contract Act Directory of Occupations" (the Directory) should be used to compare job definitions to insure that duties requested are not performed by a classification already listed in the wage determination. Remember, it is not the job title, but the required tasks that determine whether a class is included in an established wage determination. Conformances may not be used to artificially split, combine, or subdivide classifications listed in the wage determination.
